

Shell Cleaning Procedures and Guidelines

Cleveland Rowing Foundation Phase IV Covid-19 Re-Opening Procedures and Guidelines require that **ALL equipment must be cleaned after EVERY row.**

CRF will provide cleaning solution in the green buckets at the slings in front of the boathouse. If you choose to bring your own cleaning supplies, do **NOT** bring bleach products.

Rowers must provide their own towels and sponges, taking them home after each use.

- Spray the shell with cleaning solution. Be sure to spray the touchable surfaces including the inside deck of the shell, seat, gunnels, and oarlocks. Wipe solution with sponge, rinse shell and dry.
- Insert oar handles in the large white bucket of disinfecting solution in front of the boathouse. Do not rinse solution off of oars.

Please be thorough but efficient so others can have access to slings.
